FOCUS ON EDUCATIONAL RESEARCH IN THE UNITED KINGDOM

1997 – 1999

This new publication from NFER brings together in two volumes details of current and recently completed research in the United Kingdom. Each entry in **Volume 1** gives the names and addresses of the researchers, details of the duration of the project, an abstract of the work and bibliographic details of publications associated with the research. Comprehensive author and subject indices in **Volume 2** enable the user to obtain accurate information quickly and easily. These two volumes are linked to a service provided by the NFER's Library and Information Service which offers photocopies of some of the publications resulting from the research and a list of additional references. This set of two volumes will be invaluable to all those who want to find out about the latest educational research. It is an especially useful resource for fellow researchers, teachers and students.
