4 Performance at the international benchmarks	43
5 Performance in the content and cognitive domains	65
6 Gender differences	71
7 Pupils' attitudes	97
8 The teachers and schools	123
9 The pupils and the home	177
10 Factors associated with mathematics and science achievement	199
Appendix 1 Sampling	225
Appendix 2 Comparability of trend variables	227
Appendix 3 Technical details	247
References	289

Acknowledgements

This survey could not have taken place without the cooperation of the pupils, the teachers and the headteachers in the participating schools. We are very grateful for their support.

The authors would also like to thank the following colleagues for their invaluable work during the TIMSS 2007 survey and in the production of this report:

- Maria Charles, Mark Bailey, Keren Beddow, Kam Ahitan and other colleagues in the NFER's Research Data Services who undertook all the contact with the sampled schools.
- Ed Wallis, Nigel Kentleton, Jass Athwal and the other staff of the NFER's Data Capture Group and Database Production Group who organised all the data capture and cleaning
- Katherine Richardson, Louise Cooper and other researchers from the NFER's Department of Research in Assessment and Measurement who helped with various aspects of the project, including preparation of materials, marking of test booklets and/or preparation of the national report
- Margaret Parfitt, Pat Bhullar and other colleagues from the NFER's Department of Research in Assessment and Measurement for their administrative work on the project
- Jo Morrison, Louise Maycock, and other colleagues from the NFER's Statistics Research and Analysis Group who contributed, with Ben Styles and Yin Lin, to additional analysis for the national report
- Stuart Gordon, Jonathan Greenwood and others from the NFER's Design team who prepared materials, designed participants' thank-you certificates and contributed to the design of the national report
- Wendy Tury, Helen Crawley, Jan Shipston, Claire Wanless and other colleagues in the NFER's Communication, Marketing and Information Service who prepared this report for publication.

We are also grateful to the TIMSS 2007 marking team for their enthusiasm and hard work.

TIMSS is a collaborative project with a number of international partners. We would like to thank the staff of:

- Statistics Canada for their help and expertise in sampling issues
- the IEA Data Processing Center in Hamburg for their work in preparing and checking data files
- the International Study Center at Boston College and the IEA Directorate in Amsterdam for their support throughout this TIMSS study.

TIMSS 2007 in England was commissioned by the Department for Children, Schools and Families. We would like to acknowledge the support and guidance of the steering committee at the DCSF.
